For Release:

Woodstock's Going "Greener"

In celebration of Earth Day, the Woodstock Green Energy Commission will be hosting an 'open-house' at the Woodstock Town Hall on April 25th, from 10:00 am to 1:00 pm.

Their goal is to educate local community members on the importance of "Going Green" and learning more about renewable energy, energy conservation and recycling.

There will be representatives from CL&P, Alteris Renewables, Community Energy, as well as, local conservation members offering valuable information, answers to questions, demonstrations in the use of photo voltaic (PV) panels and other displays outlining conservation.

This is a great opportunity for everyone young and old to learn more about conservation and to help do their part in achieving the 20% reduction by 2010 commitment.

So, take the time and make the pledge to "Go-Green" and bring your latest CL&P statement with you... the members of the Woodstock Green Energy Commission will explain how you can purchase 'green energy' through the CT Clean Energy Options program and still save on your monthly energy costs.

The Town of Woodstock will receive a free 1Kw panel for every 100 points earned and their goal is to earn the minimum 4 panels necessary for a free installation provided by the CT Clean Energy Fund. The panels are slated for the Town Hall.
